

Bending Instructions for: TPM09 SEA TURTLE MOLD

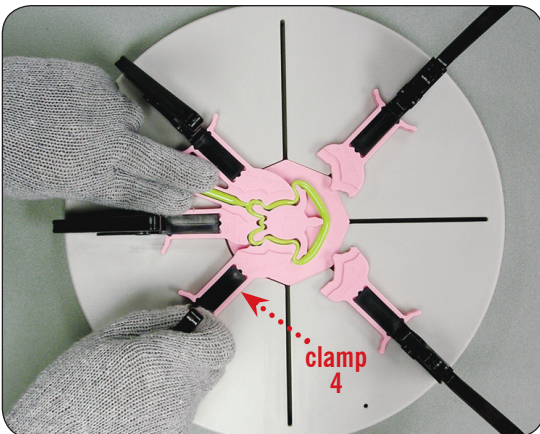

Make sure you read the full instruction manual before bending.

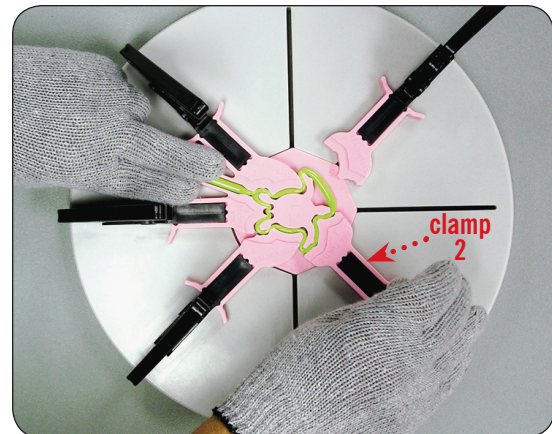

1. With a sufficiently heated pen tube, place the heated end of the tube at the start position shown above and close clamp number five.

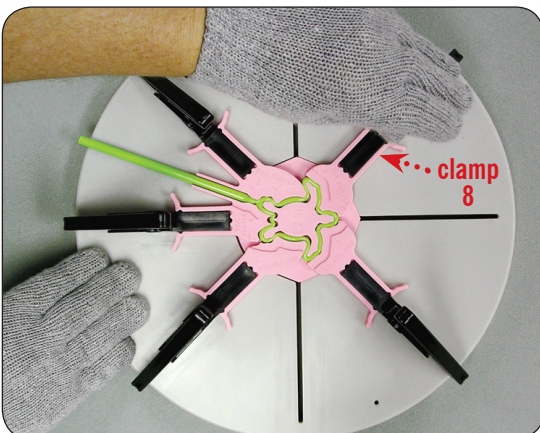

2. After the first clamp is in place, move the pen tube around the entire shape mold as shown and slowly close clamp number six.

3. Slowly close clamp number four.

4. Slowly close clamp number two.

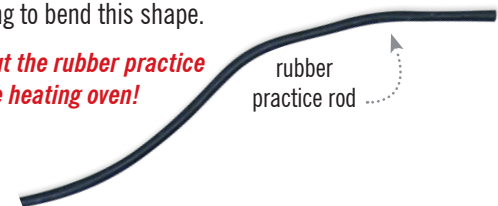

6. Finally, slowly close clamp number eight. Wait until cool and then remove by using the grip/pry tool.

Practice Makes Perfect!

Use the black rubber practice rod provided before attempting to bend this shape.

NEVER put the rubber practice rod in the heating oven!
